

Universal WiFi Display RealKast KT1 Casting Dongle Supports Miracast, DLNA, and AirPlay

The built-in dualband WiFi module supports 2.4GHz and 5GHz to avoid radio interference for better and more stable wireless display performance.

- **Product Features:**
- Cross Platforms support: iOS, Android, Windows and Mac
- Multimode support: Miracast, AirPlay, DLNA
- 2.4GHz+5GHz dualband
- Simple to operate
- H.265 4k Ultra HD video decode
- Less than 100ms latency
- Multi-screen interactive
- Large RAM and ROM for low latency and fast connection
- Build in WiFi support IEEE 801.11 a/b/g/n/ac up to 600Mbps data transfer rate with WiFi Direct capability, strong anti-jamming capability
- LPCM Audio Decode
- HDMI v1.3 video output
- HDCP 2.x
- Auto channel selection with high quality video stream
- Flexible power using TV standard USB port (min. 1000mA) or external USB power supply

Specification: Hardware

Operating system	Linux
RAM	DDR3 1Gb
ROM	1Gb
Transmission Distance	Up to 20M to playback music, photo and pdf files, Up to 15M to playback video files.
Network	WiFi 802.11 a/b/g/n/ac, 2.4GHz/5GHz, up to 600Mbps
Power Supply	DC 5V/1A(better 2A)

Physical Interface

AV Output	1*HDMI A-Type, HDMI1.4
USB	1*Micro USB for power supply

Media Support

Video Resolution	UHD 4k(3840*2160), FHD1920*1080, 1280*720, 720*480
